
Terms and Conditions

(Continued From Sheet No. 43)

LIMITATIONS OF SERVICE:

Resale Prohibited.

The Company will not furnish gas for resale, except for gas used for conversion to compressed natural gas (CNG). The term resale shall mean the furnishing of gas by a Customer to a third party where the gas so furnished is separately charged for or metered.

Redistribution of Gas.

The Customer may furnish gas for the use of third parties in a single building only, or a separate section of a building, which is unified physically and in operation, under circumstances which do not constitute resale; except that this provision shall not apply to Customers served under former Rate 24 of Schedule Illinois Commerce Commission No. 13, prior to February 5, 1978.

High Pressure Gas Service.

Gas is normally supplied by the Company from a main or service regulator normally operating at low pressure equivalent to six inches of water pressure. Two pounds per square inch gauge pressure (2 psig), is available up to 1,000 cfh, if required, and where adequate pressure is available at the service regulator. In the Mississippi River District, gas is normally supplied at four inches of mercury gauge pressure.

The Company will provide gas at high pressure, where adequate high pressure is available, to non-residential Customers whose load exceeds 10 therms per hour or whose installed equipment requires such higher pressure, upon agreement by the Company and the Customer. Such higher delivery pressure shall be supplied within the range of accuracy provided by a specified service regulator.

For billing purposes, the volume of gas registered in cubic feet by the meter at a pressure in excess of six inches of water pressure shall be corrected to a basis of four ounces (0.25 pounds) per square inch above an assumed atmospheric pressure of 14.4 pounds per square inch, or 14.65 pounds per square inch absolute pressure; the Company reserves the right to correct gas deliveries to a temperature standard of 60 degrees Fahrenheit and to apply deviation factors for supercompressibility.

Continuous Service.

The Company will endeavor to furnish a regular supply of gas to the Customer, unless otherwise specified in the rate. The liability of the Company for damages arising out of service interruptions occurring in the course of furnishing service, and not caused by the negligence of the Customer, shall in no event exceed an amount equivalent to the fixed charges that would otherwise be billed to the Customer for the period of service during which such service interruption occurs. No other liability shall in any case attach to the Company.
